

Brainstorming

- This is usually just a knowledge dump, getting students to write everything they know about whatever topic you are going to be teaching. This might come in the form of word clouds, it could be lists, it could be freewriting where students write more a stream of consciousness. This can be activated by a writing prompt or simply by writing the topic on the board.

USE

Domestic use

drink
shower/bathe
cook
clean
cooling

industrial
↓
home

flushing-sewage
hydraulic
power
recycling
Steam engines

Swimming
agriculture
golf/parks
animal farming
gardens/garbs

and limited

misting
fog = vodka

WATER

ice
laundry
cars - radiated heating

Science

winter/ice-related
sports

steaming
in food → dilute
re-dehydrated foods

gargling

boat riding
waterskiing

aquariums
water-borne diseases

products > shampoo's
mining

transportation
beautificative (fountains)
